

I don't know if you have any idea how Voom subscribers feel about Voom, but there is a upswing of positive feelings and Voom does deliver the BEST High Definition experience out there. I hope that whatever happens, Voom will somehow continue to bring HD to the masses. It seems like Voom has gotten more subs in the past 2-3 months than maybe it's first two years!! Just the thoughts of one Voom subscriber here... Thank You!
